Public Health
Prevent. Promote. Protect.

Residential Permit Fee Schedule: New: \$100.00 Repair: \$75.00

Follow the steps below in applying for an on-site sewage disposal system permit.

1. Obtain a soil profile analysis from a certified soil scientist.
2. Complete and return an application with the permit fee.
3. The Health Department will specify the size and type of the septic system that will be needed before a permit is issued.
4. An installer will draw up a plot plan with the septic system and materials on it. The Health Department will either approve the plan or recommend changes.
5. A permit for construction will be issued.
6. Call the Health Department when the system is being installed so an inspection can be conducted.
